OPEN SYSTEMC INITIATIVE

The purpose of the following license agreement (the "Agreement") is to effect the goals of the Open SystemC Initiative by encouraging interoperability and distributed development of a C++ modeling language known as "SystemC" for system simulation. The Original Contributor (as defined in the Agreement) is licensing, without fee of any kind, the SystemC software for use pursuant to the terms and conditions set forth in the Agreement.

THE ORIGINAL CONTRIBUTOR IS WILLING TO LICENSE THE SYSTEMC SOFTWARE TO YOU ONLY ON THE CONDITION THAT YOU ACCEPT ALL OF THE TERMS OF THIS LICENSE AGREEMENT. IF YOU DO NOT AGREE TO ALL OF THE TERMS OF THIS LICENSE AGREEMENT, NO RIGHTS ARE GRANTED TO YOU HEREUNDER TO USE THE SYSTEMC SOFTWARE.

1. DEFINITIONS.

1.1 "Agreement" means this document.

1.2 "Community" means the Original Contributor and each of its licensees under any version of the SystemC Open Community License.

1.3 "Copyright/Trade Secret Rights" means worldwide statutory and common law rights associated solely with (i) works of authorship including copyrights, copyright applications, copyright registrations and "moral rights", and (ii) the protection of trade and industrial secrets and confidential information. Patents are not included in Copyright/Trade Secret Rights.

1.4 "Error Correction" means any change, addition, or deletion to the Original Code that corrects the adverse effect of a failure of Original Code to perform in accordance with the Specification.

1.5   "Executable" means Original Code (with or without Interoperable Modifications) compiled into in object code form along with only those header files from such Original Code that are strictly necessary to make use of the object code.

1.6   "Internal Use" means use of Original Code only by Licensee (including Licensee's employees or agents) for the benefit of Licensee. Internal Use does not include the right to distribute any portion of Original Code (whether in Source Code or Executable form) to third parties, which right may be obtained by entering into a SystemC Commercial License Attachment with Original Contributor.

1.7   "Interoperable" means performs any function required by the Specification as determined by the Original Contributor in its reasonable discretion after consultation with certain other members of the Community .

1.8   "Licensee" means an individual or a legal entity entering into this Agreement with the Original Contributor. For legal entities, "Licensee" includes any entity that controls, is controlled by, or is under common control with Licensee. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity. Licensee is also referred to herein as "You."

1.9   "Licensee's Necessary Patent Claim" means a claim in any patent now or hereafter owned or licensable by Licensee that is directly infringed solely by the portion of an executing computer program translated, compiled or interpreted from and corresponding directly and solely to the Modification disclosed by Licensee hereunder and the SystemC Kernel Code, except that Licensee's Necessary Patent Claim shall not include any claim directed towards a data structure, method, algorithm, process, technique, circuit representation, or circuit implementation that is not completely and entirely described in the combination of such Modification and the SystemC Kernel Code.

1.10   "Modification" means any change, addition to or deletion from the substance or structure of Original Code that results in improved performance or efficiency or that creates any new object such as any new data type, process type, or operation. "Modifications" include Error Corrections.

1.11   "Original Code" means a duly authorized release of the SystemC Source Code available at http://www.systemc.org/ labeled as Original Code or the like and referencing this or any previously authorized version of this Agreement.

1.12   "Interoperable Modification" means a Modification that is Interoperable. Modifications other than Error Corrections that result in a different behavior of any pre-existing program written using the Original Code are not Interoperable with the Original Code and therefore are not Interoperable Modifications under this Agreement. For example, a modification of the semantics of the existing data types (sc_unsigned, sc_signed, sc_bool_vector, sc_logic_vector, etc.) is not an Interoperable Modification under this Agreement.

1.13   "Source Code" means human readable text in an electronic form suitable for modification that describe the functions and data structures, including C, C++, and other language modules, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or a list of source code differential comparisons against the Original Code.

1.14   "Specification" means a duly authorized release of the SystemC specification made available at http://www.systemc.org/ referencing this version of this Agreement.

1.15   "SystemC Kernel Code" means the set of compilable source and header files included in the Original Code that are necessary to build the target SystemC library object module, but does not include operating system header files, operating system library elements, documentation, example code, sample code fragments, or other ancillary information,

1.16   "SystemC Patent Claim" means a claim in any patent now or hereafter owned or licensable by Original Contributor that is directly infringed solely by the portion of an executing computer program translated, compiled or interpreted from and corresponding directly and solely to the SystemC Kernel Code, except that SystemC Patent Claim shall not include any claim directed towards a data structure, method, algorithm, process, technique, circuit representation, or circuit implementation that is not completely and entirely described in the SystemC Kernel Code as provided by Original Contributor hereunder.

2. ORIGINAL CONTRIBUTOR LICENSE GRANT.

2.1   The Original Contributor grants Licensee a world-wide, royalty-free, non-exclusive license under the Original Contributor's Copyright/Trade Secret Rights to do the following:

If Licensee breaches this Agreement by failing to strictly comply with the terms set forth herein and has not cured such breach within 30 days of the date that Licensee became aware or should have become aware of such breach, then this Agreement and the rights granted to Licensee under this Agreement, including all licenses improperly granted by Licensee to third parties, will terminate automatically effective as of the date of such breach. Sections 1, 3 (only to the extent of license grants made by Licensee), 6, 7, 8, 9, 10 and 11 of the Agreement shall survive such termination.   All licenses to third parties properly granted by Licensee under this Agreement shall also survive such termination.

10. U.S. GOVERNMENT USE.

SystemC Commercial License Attachment

This Attachment is a supplement to the SystemC Open Community License Software Download and Use Agreement (the "License") made between the parties listed below and is effective only if signed by both parties. By signing this Attachment, You become a "Commercial Licensee" in addition to being an Internal Use Licensee of the Original Code. This Attachment allows Commercial Use of theOriginal Code subject to the terms and conditions set forth herein. All capitalized terms not defined herein shall have the meaning set forth in the License. Except where superseded by this Attachment, all other terms and conditions of the License are incorporated by reference.

1. ADDITIONAL DEFINITIONS.

1.1   "Commercial Use" means any direct or indirect distribution of Original Code (with or without Interoperable Modifications), in Executable form only, by a Commercial Licensee to any third party pursuant to a license agreement which prohibits the reverse engineering (except where permitted by law), disassembling, or decompiling of the Original Code.

1.2   "Larger Work" means a work which combines Original Code (with or without Interoperable Modifications) with other code not governed by the terms of this License, wherein such Original Code serves as background technology for the other code. In order to constitute a Larger Work, a work must gain economic or strategic advantage based primarily upon such other code and not such Original Code. For example, Larger Works may include, but are not limited to, software models and software tools.

2. ORIGINAL CONTRIBUTOR LICENSE GRANT.

In addition to the licenses granted under Sections 2 and 3 of the License, the Original Contributor hereby grants Commercial Licensee the further right (without right of sublicense) under the Original Contributor's Copyright/Trade Secret Rights to make Commercial Use of the Original Code, with or without Interoperable Modifications, as part of a Larger Work. The Executable of which You make Commercial Use hereunder must be translated, compiled or interpreted from a code base which includes all of a version of the Original Code, except for any changes made pursuant to Interoperable Modifications. The Original Contributor also grants Commercial Licensee a world-wide, royalty-free, non-exclusive license under Original Contributor's SystemC Patent Claims only to the minimum extent necessary to exercise the rights granted pursuant to the preceding portion of this paragraph.

Commercial Licensee may distribute Original Code, with or without Interoperable Modifications, in Source Code form as part of a Larger Work, to any member of the Community, however, such member's right to use the Original Code so distributed shall be governed solely by the member's SystemC Open Community License with Original Contributor (including any duly executed Attachments thereto) and not by any provision herein.

Any such code distributed by Commercial Licensee must contain a prominent statement substantially similar to the following: "The following code is derived, directly or indirectly, from the SystemC source code released by Synopsys, Inc."

The license grants set forth in this section are subject to third party intellectual property claims, if any exist.

3. OFFER OF ADDITIONAL TERMS.

Commercial Licensee may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations or other terms to one or more recipients of Original Code or Executables. However, Commercial Licensee may do so only on its own behalf, and not on behalf of the Original Contributor. Commercial Licensee must make it absolutely clear than any such warranty, support, indemnity or liability obligation or other term is offered by Commercial Licensee alone.

4. INDEMNITY.

Commercial Licensee hereby agrees to defend, or at Commercial Licensee's option, to settle, at its sole expense, any claim or action brought against the Original Contributor, to the extent it is based on a claim (i) that Commercial Licensee's Commercial Use of the Original Code is an infringement of a third party intellectual property right, and/or (ii) arising in connection with any representation, warranty, support, indemnity, liability or other license terms Commercial Licensee may offer in connection with the Original Code. In connection with any such a claim, Commercial Licensee will pay all damages awarded by a court of competent jurisdiction, or such settlement amount negotiated by Commercial Licensee, attributable to such claim and shall hold the Original Contributor harmless against any damages, costs and fees reasonably incurred that are attributable to such claim or action and which are assessed against the Original Contributor in a final judgment. The Original Contributor must (a) provide Commercial Licensee notice of the claim promptly, (b) give the Commercial

Licensee sole control of the defense and settlement of the claim, (c) provide Commercial Licensee, at its expense, all available information, assistance and authority to defend such claim or action, and (d) not have compromised or settled such claim or proceeding without Commercial Licensee's written consent. Notwithstanding the foregoing, to the extent that the resolution of such claim may affect the Original Contributor's rights to make Commercial Use or any other use of the Original Code, the Original Contributor will have the right at its expense, but not the obligation, to intervene and participate in the defense of such claim.

5. NO LICENSE FEE.
The rights granted to Commercial Licensee by the Original Contributor hereunder are without license fee or royalties of any kind.

6. TERMINATION.
This Attachment and the rights granted to Licensee hereunder shall terminate upon termination of the Licensee. Section 4 of this Attachment shall survive any such termination.
